About Me

I am the Data Team Lead at SynthLabs, where I focus on research for post-training large foundation models. I received my Ph.D from the Computer Science Department at the University of California, Santa Barbara, while I was a member of the NLP Group, co-advised by William Yang Wang and Xifeng Yan.

The primary research focus of my research has been applying ML methods to NLP to improve data quality and model performance. In my research I have explored the use of methods including multi-armed bandits, data selection, multitask learning, transfer learning, reinforcement learning, and neuro-symbolic methods. Additionally, I have a wide array of interests in other topics including model efficiency, logic and reasoning, conversational AI, information retrieval, and multilingual models.

In the future, I am most interested in 2 main directions of work. First, I would like to continue my pursuit of data-centric research by understanding models from a data perspective, developing methods that improve data quality and data efficiency. Additionally, I am also very excited to apply my data-centric background to many areas of ML research, including model pretraining, alignment, reasoning, and tool use, as well as other modalities (e.g. vision and robotics).

Education

- 2018–2024 *Ph.D, Computer Science, University of California, Santa Barbara.*
[UCSB NLP Group](#)
Dissertation: [Understanding and Improving Language Models Through a Data-Centric Lens](#)
Advisors: [William Yang Wang](#) and [Xifeng Yan](#)
- 2016–2018 *B.S., Mathematics, Wayne State University.*

Selected Publications ([Full publication list](#))

- 2025 *Generalization vs. Memorization: Tracing Language Models' Capabilities Back to Pretraining Data.*

Professional Experience

- April 2024 – present *Data Team Lead, SynthLabs.*
- Directed the data team, focused on enhancing alignment and complex reasoning capabilities in LLMs
 - Determined and executed the internal research agenda on synthetic data generation, data filtering, and reward models
 - Developed and led open-science collaborations with the broader research community
 - Resulting Publications:** (1) [Generative Reward Models](#), (2) [Towards System 2 Reasoning in LLMs: Learning How to Think With Meta Chain-of-Thought](#)
- June 2022 – *Research Science Intern, Meta AI.*
- September 2022
- Directed and executed on 2 projects in collaboration with researchers across the company
 - Explored data-efficiency through the use of multi-task learning and various prompting methods for small language models
 - Explored the use of parameter-efficient methods for zero-shot generalization
 - Resulting Publications:** [Data-Efficiency with a Single GPU](#)
- June 2019 – *Research Associate, Theta Lake.*
- September 2020
- Built classifiers for automated risk detection in regulated industries through the use of natural language processing and other machine learning techniques
 - Took multiple projects from inception to production, developing a patent along the way
 - Resulting Patent:** US Patent 11914963

Fellowships & Awards

- 2023 *Neurips Scholar Award, 37th Conference on Neural Information Processing Systems.*
- 2018 *Integrative Graduate Education and Research Traineeship (IGERT) Fellow, University of California, Santa Barbara.*
- 2018 *Academic Excellence Fellowship, University of California, Santa Barbara.*
- 2018 *Chia Kuei Tsao Award, Wayne State University.*
For outstanding academic achievement in the undergraduate mathematics program

Service & Outreach

- ACL 2023-24 Workshop Organizer - NLP For Conversational AI ([NLP4ConvAI](#))
- ACL 2023 Social Organizer - Mindfulness meditation in a time of NLP hyperactivity
- NeurIPS 2022 Workshop Organizer - Transfer Learning for NLP ([TL4NLP](#)): Insights and Advances on Positive and Negative Transfer. [Proceedings.](#)
- 2022-2024 Program Committee: ACL, NAACL, EMNLP, AAAI

Technical skills

- Tools Python, C++, Shell, AWS, Azure
- Packages PyTorch, TensorFlow, HuggingFace, NumPy, SciPy
- Machine Learning Natural language processing (NLP), computer vision (CV), transformers, generative AI, statistical analysis, regression, clustering

Military Experience

- 2012 – 2015 *Reconnaissance Sabotage Unit, Israel Defense Forces.*
- Engineering, demolitions, and reconnaissance specialty training
 - Battalion lead navigator
