## About Me

I am the Data Team Lead at SynthLabs, where we focus on research for post-training large foundation models. I received my Ph.D from the Computer Science Department at the University of California, Santa Barbara, while I was a member of the NLP Group, co-advised by William Yang Wang and Xifeng Yan.

**The primary research focus of my research has been applying ML methods to NLP to improve data quality and model performance.** In my research I have explored the use of methods including multi-armed bandits, data selection, multitask learning, transfer learning, reinforcement learning, and neuro-symbolic methods. Additionally, I have a wide array of interests in other topics including model efficiency, logic and reasoning, conversational AI, information retrieval, and multilingual models.

**In the future, I am most interested in 2 main directions of work.** First, I would like to continue my pursuit of data-centric research by understanding models from a data perspective, developing methods that improve data quality, and improving data efficiency. I am also very excited to apply my data-centric background to many areas of ML research, including model pretraining, alignment, fine-tuning, tool use, and neuro-symbolic systems.

## Education

- 2018–2024 *Ph.D, Computer Science, University of California, Santa Barbara.*  
[UCSB NLP Group](#)  
Dissertation: [Understanding and Improving Language Models Through a Data-Centric Lens](#)  
Advisors: [William Yang Wang](#) and [Xifeng Yan](#)
- 2016–2018 *B.S., Mathematics, Wayne State University.*

## Selected Publications ([Full publication list](#))

- 2024 *DataComp-LM: In search of the next generation of training sets for language models.*

## Selected Projects

- February 2021 – present
- *Recommender Dialogue Systems, in collaboration with UCSC, USC, Google.*
  - Actively collaborating with researchers across institutions to solve problems in dialogue systems such as explainability, information extraction, and zero- or few-shot dialogue classification tasks
  - **Resulting Publications:** [FLAD](#), [FETA](#), [NeuPSL](#), [D-REX](#)

Advisors : Industry - [William W. Cohen](#) and [Tania Bedrax-Weiss](#)  
Academic - [William Yang Wang \(UCSB\)](#), [Lise Getoor \(UCSC\)](#), and [Jay Pujara \(USC\)](#)

June 2021 – *Alexa Prize Taskbot Challenge, Team Lead.*

- June 2022
  - o 8% acceptance rate
  - o Led and advised UCSB's "Team GauchoBot" in developing an agent that assists real Alexa customers to complete cooking and do-it-yourself projects that require multiple steps and complex decision making
  - o Designed algorithms for intent classification and question answering as well as the communication architecture between modules
  - o **Resulting Publication:** [Making Something out of Nothing](#)

May 2021 – *COVID(ATAK), in collaboration with IARPA and Peraton Labs.*

- October 2021
  - o Mentored a visiting undergraduate researcher
  - o Built a multilingual open-retrieval question answering system for COVID-related journal articles and a clinical trials database
  - o Designed and implemented:
    - a multilingual deep semantic indexing method to retrieve relevant documents
    - a multilingual reading comprehension system to find answers within a document
  - o **Resulting Publication:** [Paper/code](#)

## Professional Experience

April 2024 – *Data Team Lead, Member of Technical Staff, SynthLabs.*

- present
  - o Directed the internal research agenda on synthetic data generation, data filtering, and reward models
  - o Developed and lead open-science collaborations with the broader research community

June 2022 – *Research Science Intern, Meta AI.*

- September 2022
  - o Directed and executed on 2 projects in collaboration with researchers across the company
  - o Explored data-efficiency through the use of multi-task learning and various prompting methods for small language models
  - o Explored the use of parameter-efficient methods for zero-shot generalization
  - o **Resulting Publications:** [Data-Efficiency with a Single GPU](#)

June 2019 – *Research Associate, Theta Lake.*

- September 2020
  - o Built classifiers for automated risk detection in regulated industries through the use of natural language processing and other machine learning techniques
  - o Took multiple projects from inception to production, and developed 2 patent pending methods along the way
  - o **Resulting Patent:** US Patent 11914963

## Fellowships & Awards

2023 *Neurips Scholar Award, 37th Conference on Neural Information Processing Systems.*

2018 *Integrative Graduate Education and Research Traineeship (IGERT) Fellow, University of California, Santa Barbara.*

2018 *Academic Excellence Fellowship, University of California, Santa Barbara.*

2018 *Chia Kuei Tsao Award, Wayne State University.*

For outstanding academic achievement in the undergraduate mathematics program

## Service & Outreach

ACL 2023-24 Workshop Organizer - NLP For Conversational AI ([NLP4ConvAI](#))

ACL 2023 Social Organizer - Mindfulness meditation in a time of NLP hyperactivity

NeurIPS 2022 Workshop Organizer - Transfer Learning for NLP ([TL4NLP](#)): Insights and Advances on Positive and Negative Transfer. [Proceedings](#).

2022-2024 Program Committee: ACL, NAACL, EMNLP, AAAI

## Technical skills

Tools Python, C++, Shell, AWS, Azure  
Packages PyTorch, TensorFlow, HuggingFace, NumPy, SciPy  
Machine Learning Natural language processing (NLP), computer vision (CV), transformers, generative AI, statistical analysis, regression, clustering

## Military Experience

2012 – 2015 *Reconnaissance Sabotage Unit, Israel Defense Forces.*

- o Engineering, demolitions, and reconnaissance specialty training
- o Battalion lead navigator
