## About Me

I am a Ph.D candidate in the Computer Science Department at the University of California, Santa Barbara, and a member of the NLP Group, co-advised by William Yang Wang and Xifeng Yan.

**My primary research focus is on applying ML methods to NLP**, such as multi-armed bandits, data selection, multitask learning, transfer learning, reinforcement learning, and neuro-symbolic methods. Additionally, I have a wide array of interests in other topics including model efficiency, logic and reasoning, conversational AI, and multilingual models.
